

# Wind-eze<sup>®</sup>

Simeticone GEL CAPS

## What Wind-eze Gel Caps do To relieve the symptoms of stomach pain and bloating due to the presence of trapped wind.

The main ingredient is simeticone, an anti-flatulent, which works by gently dispersing the tiny bubbles of trapped wind, without the risk of embarrassment.

## Do not take Wind-eze Gel Caps:

- if you are allergic to simeticone or any of the other ingredients.
- if you are under 12 years.

## Take special care with Wind-eze Gel Caps

If symptoms persist for more than 14 days, or if symptoms worsen, medical advice must be sought.

Simeticone is inert and not absorbed into the body. Wind-eze soft gel caps are not known to cause any unwanted effects.

## How to take Wind-eze Gel Caps

Adults and children aged 12 years and over: **Swallow 1 capsule with a drink of water 3 or 4 times daily after meals and at bedtime as needed.**

**Not recommended for children under 12 years.**

Do not exceed the stated dose.

**Main ingredient** Each capsule contains Simeticone 125 mg (activated dimeticone).

**Other ingredients** Gelatin, glycerol, titanium dioxide (E171) and purified water.

Keep out of the reach and sight of children.  
Do not use after the expiry date on the pack.  
Do not store above 25°C.
